Appendix B 20

1. INTRODUCTION

This Compliance Assessment Report ("Report") is submitted to meet Condition 4.6 of Ministerial Statement 813 for the Simcoa Operations Pty Ltd Silicon Project (Smelter and Mine). The Report has been prepared in accordance with Revision 01 of the Compliance Assessment Plan ("Plan") approved by the Office of the EPA (OEPA).

The report covers the 12 months ending on 16 November 2025, unless otherwise noted in the audit table.

The report is an Audit against Ministerial Statement 813. We note that on 12th September 2025 the Minister issued a new Statement which includes the North Kiaka Mine Project. Next year the Audit will address the new Statement.

2. STATEMENT OF COMPLIANCE

During the reporting period, Simcoa Operations Pty Ltd (Simcoa) has complied with all of the relevant conditions of Ministerial Statement 813.

Refer to **Appendix A** to review an audit table detailing compliance to Ministerial Statement 813 conditions.

Appendix B shows comparisons between the authorised extent of physical and operational elements and recent data.

Please note that in October 2016, the EPA amended Statement 813 in response to a 45c application from Simcoa. This resulted in the removal of Schedule 1 from statement 813, and its replacement with an amended Attachment 1.

This resulted in several changes to the authorised extent of physical and operational elements, most notably:

- Amended depth of pit to allow mining below the water table;
- Increased the groundwater requirements at Moora from 80,000 kilolitres per annum to 250,000 kilolitres per annum;
- Included water discharge via Kiaka Creek to the Coonderoo River wetlands;
- Removed key characteristics which are not environmentally significant or regulated by other authorities.

Additionally, in August 2021, the EPA again amended Statement 813 in response to a 45c application from Simcoa. This resulted addition of Attachment 2.

This resulted in further changes to the authorised extent of physical and operational elements, most notably:

- Modification of Moora mine disturbance footprint and addition of a Development Envelope
- Change to dewater discharge location
- Increase in authorised extent of water consumption (groundwater) for Kemerton from 290,000 kL per annum to 312,000 kL per annum.
- Specify extent of native vegetation clearing within disturbance footprint.
- Replacement of Table 4, with a file reference number to identify the change in coordinates of the dewater discharge location.

3. NON COMPLIANCES AND CORRECTIVE ACTIONS

There were no non-compliances identified in the compliance assessment.

In relation to Ministerial condition 8-3(1), Simcoa is continuing with its rehabilitation program, and has been successful in establishing species in the rehabilitation areas that are present in the Coomberdale Chert Threatened Ecological Community (TEC). However, it is unlikely that Simcoa will be able to replicate a comparable species composition due to the differences in the substrate present in the waste rock dump areas under rehabilitation. The substrate is highly broken up and has less water retaining capacity than the original massive chert substrate, with the rehabilitated areas being more susceptible to impacts arising from changes in rainfall. This challenge has been noted by the EPA, for example in EPA Bulletin 1027 issued in September 2001, in which support was given to Simcoa's proposed Resource Access and Conservation Package (Cairn Hill Conservation Area). In addition, management of weed ingress is a continuing challenge in the rehabilitation areas due to the Moora Mine being surrounded by agricultural land under a variety of pasture crops. With these matters in mind, Simcoa intends to discuss the formulation of more achievable rehabilitation outcomes for North Kiaka Project currently being assessed by the EPA.

4. COMPANY ENDORSEMENT

This report has been endorsed by:

David Miles
Vice President (Site Services and Marketing)
SIMCOA OPERATIONS PTY LTD

Please refer to the approval section at the beginning of the report.

5. AUDIT TABLE

The audit table can be found in **Appendix A** of the report.

6. PUBLIC AVAILABILITY

This report will be made publicly available on the Simcoa website www.simcoa.com.au as required by the Compliance Assessment Plan.

PROJECT:
SILICON
PROJECT,
KEMERTON AND
MINE AT MOORA

Note:

- Phases that apply in this table = **Pre-Construction, Construction, Operation, Decommissioning, Overall (several phases)**
- This audit table is a summary and timetable of conditions and commitments applying to this project. Refer to the Minister's Statement for full detail/precise wording of individual elements.
- Code prefixes: M = Minister's condition; P = Proponent's commitment; A = Audit specification; N = Procedure.
- Any elements with status = "Audited by proponent only" are legally binding but are not required to be addressed specifically in compliance reports, if complied with.
- Acronyms list:- Minister for the Environment - Min for Env; Chief Executive Officer - CEO; Department of Environment – DoE (now DWER – Dept of Water and Environmental Regulation); Evaluation Division - Part IV; Pollution Prevention Division - Part V; Waste Management Division - WMD; Department of Conservation and Land Management – CALM (now DBCA - Department of Biodiversity, Conservation and Attractions); Department of Minerals and Energy – DME (now DMIRS - Department of Mines, Industry Regulation and Safety); Environmental Protection Authority - EPA; Health Department of WA - HDWA; Water and Rivers Commission - WRC; Bush Fires Board - BFB.

Date Compiled: 5 November 2025

Audit Code	Subject	Action	How	Evidence	Satisfy	Advice	Phase	When	Status / Remarks
813:M1.1	Proposal Implementation	The proponent shall implement the proposal as assessed by the EPA and described in schedule 1 of this statement subject to the conditions and procedures of this statement	Implement the proposal according to the requirements of Statement 813 including the key proposal characteristics	Annual Compliance Assessment Report – comparison of project against key proposal characteristics table using the most available reporting data Please note: Data from the most recently submitted annual reports will be used for comparison purposes, this may not align with the entire 12 months of the annual compliance assessment report	Min. for Env.		Overall – Kemerton and Moora	At all times	The implemented proposal is consistent, given the current implementation status of the proposal i.e. 3 furnaces, with the key proposal characteristics described in Statement 813 – refer to Appendix B
813:M2.1	Proponent Nomination and Contact Details	The proponent for the time being nominated by the Minister for Environment under sections 38(6) or 38(7) of the <i>Environmental Protection Act 1986</i> is responsible for the implementation of the proposal	Letter to the Min. for Env. outlining any changes to the proponent	Letter to the Min. for Env. outlining any changes to the proponent	Min. for Env.		Overall – Kemerton and Moora	At all times / Change to the proponent	Condition not triggered

									b) Development of the Main and Western pit consistent with EPA Bulletin 1027. c) Pit extent and haul road development.
813:M6.2	Flora	The proponent shall provide annual reports to the CEO on mining activities, indicating those areas cleared, and shall advise the CEO within seven days of the event that detrimental effects on any of the abovementioned flora is observed. Close liaison with the Department of Environment and Conservation (DEC) should take place.	1. Report annually to the CEO on clearing and disturbance of listed flora in the Annual Environmental Report 2. Advise the CEO within 7 days of observing a discernible detrimental effect that could be reasonably attributed to mining activities (with the exception of that approved in 6-1) 3. Advise the DEC as soon as practicable when unplanned impacts to native vegetation are observed	1. Moora Quartz Mine Annual Environmental Report with distribution to the DEC 2. Letter to the CEO advising of detrimental affect 3. Correspondence with DEC stating that native vegetation has been affected	CEO		Overall Moora –	1. Annually 2. Within 7 days of observing a discernible detrimental affect 3. As soon as practicable	1. AER 2024 2. No discernible effect outside of 6-1 3. Not triggered
813:M7.1	Mining and Conservation Strategy	Prior to expansion of mining into the Eastern Ridge area, the proponent shall revise and update the Mining and Conservation Strategy required under Condition 20 of Statement 575, in co-operation with the DEC, and to the requirements of the Minister for Environment on advice of the DEC. The objective of this strategy is to ensure that conservation of	Revise the Mining and Conservation Strategy and ensure that it addresses the matters listed in 7-1. 		including Priority and Declared Rare flora species, to the requirements of the CEO and the Director General of the Department of Mines and Petroleum (DMP).						mining proposal	local native flora species, including Priority and Declared Rare flora species, A full report on rehabilitation activities and status is provided in the 2024 DMIRS AER.
813:M8.3	Rehabilitation	The proponent shall progressively rehabilitate the mine site area in accordance with the following: 1. Re-establishment of vegetation in the rehabilitation area to be comparable in species composition with that of the pre-mining vegetation such that the following criteria are met: a. revegetation to achieve the re-establishment of an area of vegetation coverage (not including weed species) of not less than 70 percent of the rehabilitation area as defined in Schedule 1; b. weed coverage less than 10 percent; and c. within a time frame specified in the rehabilitation schedule required Condition 8-3-2. 2. A schedule of the rate of rehabilitation acceptable to the CEO.	1. Establish a schedule of rehabilitation that specifies the rate of rehabilitation and timing to meet the completion to criteria listed in 813:M8.3 2. Progressive rehabilitation of mining areas according to the schedule.	1. A schedule of the rate of rehabilitation that has been deemed acceptable to the CEO 2. Annual Environmental Report (which will contain monitoring data that includes species composition, coverage, area under rehabilitation, photographs of rehabilitation areas and progress against the schedule) Please note: The most recent Annual Environmental Report (AER) submitted to DEC / DMP will be referenced and this may not align with the entire 12 months of the annual compliance assessment report	CEO		Overall Moora –	1. Prior to first compliance report 2. According to schedule	1. Rehabilitation scheduling and planning is detailed in the Moora Mine site Mine Closure Plan, that is updated every 3 years Rate and rehabilitation progress is reported annually in AER. Refer 2024 AER. 2. In process; rehabilitation monitoring was included in the 2024 AER.

		of commencement of ground-disturbing activities, a Greenhouse Gas Abatement Report which meets the objectives set out in condition 9-2, as determined by the Minister for Environment.						ent of ground-disturbing activities – 2 Sept 2011	to OEPA on 2 Sept. 2011 and final revision on 5 Sept. 2011
813:M9.2	Greenhouse Gas Abatement	The objectives of the Greenhouse Gas Abatement Report required by condition 9-1 are to: 1. Demonstrate that maximising energy efficiency and opportunities for future energy recovery have been given due consideration in the design of the third and fourth submerged electric arc furnaces; 2. Ensure that the “greenhouse gas” intensity (“greenhouse gas” per unit of silicon produced) is equivalent to, or better than, benchmarked world’s best practice; and 3. Achieve continuous improvement in “greenhouse gas” intensity through triennial review, and if practicable, adoption of advances in technology and process management.	Ensure that the Greenhouse Gas Abatement Report demonstrates/includes: 1. Consideration has been given to maximising energy efficiency and future energy recovery in the design of furnaces 3 and 4 2. “Greenhouse gas” intensity is equivalent or better than benchmarked world’s best practice, provided that furnace 3 and/or 4 have been commissioned at the time the report is due 3. Undertake a triennial review meeting to identify and where practicable adopt advances in technology and process management to achieve continuous improvement in “greenhouse gas” intensity	Greenhouse Gas Abatement Report includes: 1. Information on relevant design alternatives, comparative energy efficiencies, design features that facilitate future application of energy recovery 2. Justification where the most efficient design alternatives were not selected 3. Comparison between Scope 1 GHG intensity of the Simcoa Smelter and a cohort of smelters that can reasonably considered to be world’s best practice in terms of “greenhouse gas” intensity, using available industry data (CRU Analysis - Silicon Production Cost Analysis) and applying the current NGERS estimation methodology 4. Minutes and outcomes of triennial review meetings	Min. for Env.		Overall – Kemerton	Within 18 months of commencement of ground-disturbing activities – 2 Sept 2011	Greenhouse Gas Abatement Report (Rev 01) submitted to OEPA on 2 Sept. 2011 and final revision on 5 Sept. 2011 Triennial review completed in 2014, 2017, 2020 and 2023.

APPENDIX B

Comparison between proposal characteristics and recent data

APPENDIX B

In October 2016, the EPA amended Statement 813 in response to a 45c application from Simcoa. This resulted in the removal of Schedule 1 from statement 813, and its replacement with an amended Attachment 1.

The most notable changes resulting from this change are as follows:

- Remove depth of pit to mine below the water table;
- Increase the groundwater requirements at Moora from 80,000 kilolitres per annum to 250,000 kilolitres per annum;
- Include water discharge via Kiaka Creek to the Conderoo River wetlands;
- Administrative changes to remove key characteristics which are not environmentally significant or regulated by other authorities.

Additionally, in August 2021, the EPA again amended Statement 813 in response to a 45c application from Simcoa. This resulted addition of Attachment 2.

This resulted in further changes to the authorised extent of physical and operational elements, most notably:

- Modification of Moora mine disturbance footprint and addition of a Development Envelope
- Change to dewater discharge location
- Increase in authorised extent of water consumption (groundwater) for Kemerton from 290,000 kL per annum to 312,000 kL per annum.
- Specify extent of native vegetation clearing within disturbance footprint.
- Replacement of Table 4, with a file reference number to identify the change in coordinates of the dewater discharge location.

The below table details the comparison between the authorised extent of physical and operational elements, and most recent data.

Authorised extent of physical and operational elements

Element	Authorised Extent	Actual Extent	Data Source
Silicon Production	64,000 tonnes per annum (approximately)	43,770 Tonnes	AER 2024
Quartzite Consumption	160,000 tonnes per annum (approximately)	115,819 Tonnes	AER 2024

Wood for Charcoal	110,000 tonnes per annum (approximately)	89,369 Tonnes (Wet weight)	AER 2024
Charcoal Production	27,000 tonnes per annum (approximately)	20,412 Tonnes	AER 2024
Smelter Furnaces	4 submerged electric arc furnaces	3 submerged electric arc furnaces	Direct observation
Off-gas Cleaning Plant (Baghouses)	One large baghouse with stacks One large baghouse without stacks	One large baghouse with stacks One large baghouse without stacks	Direct observation
Water Consumption (Groundwater)	312,000 kL per annum (Kemerton)	262,061 kL	Onsite Metering for 2024 year
Quartzite Production	160,000 tonnes per annum of lump quartz (approximately)	115,489 Tonnes	AER 2024 (Moora)
Total area of disturbance	Clearing of no more than 25 ha of native vegetation within a disturbance footprint of not more than 93 ha (Moora mine)	Approx 19.33 ha of native vegetation clearing within disturbance footprint of 93 ha	AER 2024 (Moora)
Area of rehabilitation	All disturbed areas (Moora Mine)	All areas disturbed by mining activities areas are subject to rehabilitation which is outlined in the rehabilitation schedule	NA
Depth of pit	Not more than 165 metres RL	210 metres RL No change	AER 2024 (Moora)
Water requirements (Groundwater)	250,000 kilolitres per annum (Moora mine)	61,045 kL	AER 2024 (Moora)

Water source	Fractured Rock Aquifer (Moora Mine)	Fractured Rock Aquifer	GWL 104693
Water Discharge	Discharge of up to 122,000 kL per annum of dewatered groundwater via Kiaka Creek to the Conderoo River wetlands. (Moora Mine)	0 kL (Dewatering yet to be undertaken)	NA
Dewater discharge pipeline (Moora mine)	Dewater discharge pipeline routed along an existing access road. (Moora Mine)	NA (Dewatering yet to be undertaken)	NA

Please note: The quantities specified in the above table are based on a 4 furnace operation. At the time of the 2024 AER, the plant had 3 operating furnaces. The 3rd furnace was commissioned in September 2012.
